FREE & VIRTUAL

We are pleased to announce an exciting virtual education programme on wound assessment and management; pressure ulcers/injuries; leg ulcers and hard to heal wounds. The 4-day programme is free thanks to an educational grant from ConvaTec as part of their 25 years of AQUACEL ® celebrations.

The fully virtual programme has been specially designed by the experts at the Welsh Wound Innovation Centre and offers independent, objective and unbiased clinical education in the field of advanced wound care for healthcare professionals.

The content will be delivered over 4 days and is open to anyone who would like to develop and expand their wound healing knowledge. The days will be dynamic and informative and are designed to make the online learning experience as exciting and interactive as possible.

You are invited to sign up for single days or as many days that take your interest. The first date is scheduled for 9 March 2022. For further information/to register please click on the link below:
