Wound Healing and Tissue Repair (MSc)

The MSc in Wound Healing and Tissue Repair is a three-year, inter-disciplinary, part-time, distance learning course which aims to enable you to explore and analyse existing and developing theories and concepts that underpin wound healing and tissue repair so facilitating professional and personal growth, building upon your educational and vocational experience and developing your ability to become a life-long learner.

Distinctive Features

- This is a well-established course, first conceived as a postgraduate diploma in 1996 and extended to a Master of Science (MSc) in 1999.
- The course has attracted healthcare professionals from the field of nursing, medicine, pharmacy, podiatry and the pharmaceutical industry, and offers the opportunity to study at a distance alongside an international group of professionals from countries such as Ireland, Holland, Italy, Saudi Arabia, South Africa and New Zealand.
- Hyperlinked reading lists to facilitate easy access to resource material.
- One-to-one and group tutorials are arranged online to encourage both lecturer and peer support and to suit students in different time zones.
- Self-assessment tests from the course material are also linked to discussion board groups in order to facilitate sharing of information and further facilitate peer support.

Modules

The modules shown are an example of the typical curriculum and will be reviewed prior to the 2017/18 academic year. The final modules will be published by July 2017.
